Student Testimonial

"Great instructor with very valuable real-world experience. Instructor welcomed class participation and created an interactive environment where we were able to solidify new concepts and skills learned in class. Instructors real world experience also allowed him to further explain how this solution is implemented and deployed in various industries across the country." (DCUCD Course)

--- Zhani Pellumbi, New York Presbyterian Hospital

Cloud Computing

Cloud Computing enables "Everything as a Service" and allows a major shift in business models from a CapEx to an OpEx approach. It also accelerates and automates the deployment of new services and solutions.
