

# Fast Lane Company Overview

- Routing & Switching
- Unified Communications
- Business Video
- Security & VPN
- Data Center
- Service Provider
- Wireless LAN
- Optical
- Career Certifications
- Channel Partner Program
- Virtualization

Advance your network engineering skills in working on complex network solutions.

# Why Fast Lane?

---

Learning with Fast Lane means real-world experience that translates from the classroom to the job with ease. Our vendor-certified instructors have expertise with the most advanced technologies, and can explain each at a level that ensures each student gains the knowledge and skills to immediately impact their productivity. Plus, Fast Lane offers a variety of foundation courses led by our vendor-certified instructors which will prepare you to use the “hottest” technologies.

## 2010 Cisco CLSP Award Winners

- Cisco European Learning Partner of the Year
- Excellence in Acceleration — Worldwide and European Markets
- Excellence in Collaboration — European Markets
- Excellence in Innovation — Emerging Markets

## Fast Lane is NetApp's and Cisco's only globally authorized learning partner

Fast Lane delivers NetApp and Cisco training programs worldwide. Our trainers are NetApp and Cisco certified specialists with extensive storage and networking experience.

## Access to unrivaled lab infrastructure

Fast Lane customers enjoy the use of state-of-the-art training and demo labs for all areas of high-end networking. Equipped with the latest devices and technologies, our labs provide first-rate service and raise the bar for training quality. Our project consultants can access these labs from any location.

## Quality Assured

A comprehensive evaluation system ensures Fast Lane always delivers education to the most rigorous quality standards. With professional experience and excellent teaching skills, all of our instructors and consultants transfer knowledge efficiently and effectively.

## Expertise

Virtualization and data center, voice, video and unified communications, security, wireless or optical technologies — whatever specialized insight, skills, and consulting you may need, Fast Lane has the ability to support your requirement.

## Our Aim

Working with Fast Lane is always a great experience. We are committed to customer service and a quick response to all client enquiries. We can deploy troubleshooting experts within a few hours and organize on-site training within 24 hours.

## Shouldn't you learn from the best in the business?

Fast Lane, a leading provider of advanced IT training courses, offers complete authorized training solutions for Cisco, NetApp, IBM, VMware and Ubuntu. This allows Fast Lane to uniquely offer multi-vendor courses that address today's real-world IT challenges. Fast Lane is the fastest-growing Cisco Learning Solutions Partner (CLSP) and the only CLSP authorized in all eight of Cisco's geographic regions.

# Who We Are...

Fast Lane offers quality IT training that prepares you for real-world application

## Leaders in Advanced and Emerging Technology

Fast Lane has earned a reputation as the go-to company for sophisticated IT projects, entailing both consultation and training programs. No matter what your company's IT requirements might be, Fast Lane has the skills and experience to help achieve your company's business goals. Fast Lane consultation services advise companies on the selection of future-focused IT solutions, providing support throughout the development phases to ensure organizations are getting maximum return on investment from their IT infrastructure.

## Data Center / Virtualization / Multi-Tenancy

Data center virtualization brings the potential to deliver dramatic savings in terms of server count, footprint, and storage requirements for data centers. For all its advantages though, virtualization also brings some unique challenges:

- There will be fewer servers, but each one will be more critical than ever.
- Applications can be dynamically reallocated at will, but the support infrastructure cannot do the same.
- Server virtualization puts new demands on storage environments and data protection processes.

As operational requirements and newer technology adoption has escalated within the data center, it is critical that related IT training be available to support successful business continuity. Having in-depth expertise in Cisco, VMware, and NetApp technologies, Fast Lane is in a unique position to be able to offer a portfolio of training courses that cover your data center and virtualization training requirements.

## Fast Lane Video Portfolio

TANDBERG, TelePresence, Digital Media Systems, and Academy of Digital Signage Certification Training

- TANDBERG includes two and five day courses providing information on video and corresponding network architectures. You will also learn installing, configuring, maintaining, as well as basic and advanced troubleshooting of the TANDBERG product portfolio.
- TelePresence provides a five-day, instructor-led course designed to help you prepare for the Cisco TelePresence Solutions Specialist certification.
- Digital Media Systems (DMS) training enables users to install, configure and troubleshoot DMS.
- Academy of Digital Signage (ADS) — until now, there has been no advanced training for the contemporary digital signage professional. The Cisco Academy of Digital Signage has been designed to train the next wave of innovators and content professionals.

Fast Lane has met the requirements for  
Cisco Education Specializations

Fast Lane was named by TrainingIndustry.com in 2009 as one of the Top 20 IT Training Companies for the second year in a row.
