

Check Point Security Administration & Security Expert Bundle (CCSA/CCSER)

ID CP-CCSA/CCSER Price US\$ 5,000 Duration 5 days

DELIVERY METHODS

ILT – Instructor-Led Classroom Training
ILT sessions are conducted in a physical classroom environment.

ILO – Instructor-Led Online Training
ILO sessions are conducted via WebEx in a VoIP environment

FLEX Classroom™ – Combined ILT & ILO
FLEX Classroom sessions are delivered via ILT and ILO giving you the ultimate flexibility.

Course Overview

This special CCSA and CCSE bundle covering Check Point Certified Security Administrator and Security Expert content (R80.40) validates and enhances your skills to manage Check Point advanced security management systems and to administer IT security fundamental tasks.

Who should attend

This special combo or bundle course is recommended for Systems Administrators, Network Engineers, Security Managers, Support Analysts and any other IT professional working with Check Point Software Blades or seeking CCSA and CCSE certifications.

Prerequisites

- General knowledge of TCP/IP
- Working knowledge of Windows, UNIX, networking, TCP/IP, and the Internet

Course Objectives

- Introduction to Check Point Technology
- Security Policy Management
- Policy Layers
- Check Point Security Solutions and Licensing

- Traffic Visibility
- Basic Concepts of VPN
- Managing User Access
- Working with ClusterXL
- Administrator Task Implementation
- System Management
- Automation and Orchestration
- Redundancy
- Acceleration
- SmartEvent
- Mobile and Remote Access
- Threat Prevention

Detailed Course Outline

- **1 - CCSA Course Outline**
 - Interpret the concept of a Firewall and understand the mechanisms used for controlling network traffic.
 - Describe the key elements of Check Point's unified Security Management Architecture.
 - Recognize SmartConsole features, functions and tools.
 - Understand Check Point deployment options.
 - Describe the basic functions of Gaia.
 - Describe the essential elements of a Security Policy.
 - Understand how traffic inspection takes place in a unified Security Policy.
 - Summarize how administration roles and permissions assist in managing policy.
 - Recall how to implement backup

techniques.

- Understand the Check Point policy layer concept.
 - Recognize Check Point security solutions and products and how they work to protect your network.
 - Understand licensing and contract requirements for Check Point security products.
 - Identify tools designed to monitor data, determine threats and recognize performance improvements.
 - Identify tools designed to respond quickly and efficiently to changes in gateways, tunnels, remote users, traffic flow patterns, and other activities.
 - Understand Site-to-Site and Remote Access VPN deployments and communities.
 - Understand how to analyze and interpret VPN traffic.
 - Recognize how to define users and user groups.
 - Understand how to manage user access for internal and external users.
 - Understand the basic concepts of ClusterXL technology and its advantages.
 - Understand how to perform periodic administrator tasks as specified in administrator job descriptions.
- **2 - CCSE Course Outline**
 - Identify advanced CLI commands.
 - Understand system management procedures, including how to perform system upgrades and apply patches and hotfixes.
 - Describe the Check Point Firewall infrastructure.
 - Describe advanced methods of gathering important gateway data using CPView and CPInfo.
 - Recognize how Check Point's flexible API architecture supports automation and orchestration.
- Discuss advanced ClusterXL functions.
 - Describe VRRP network redundancy advantages.
 - Understand how SecureXL acceleration technology is used to enhance and improve performance.
 - Understand how CoreXL acceleration technology is used to enhance and improve performance.
 - Identify the SmartEvent components that store network activity logs and identify events.
 - Discuss the SmartEvent process that determines which network activities may lead to security issues.
 - Understand how SmartEvent can assist in detecting, remediating, and preventing security threats.
 - Discuss the Mobile Access Software Blade and how it secures communication and data.
 - Understand Mobile Access deployment options.
 - Recognize Check Point Remote Access solutions.
 - Discuss Check Point Capsule components and how they protect mobile devices and business documents.
 - Discuss different Check Point Solutions for attacks such as zero-day and Advanced Persistent Threats.
 - Understand how SandBlast, Threat Emulation, and Threat Extraction prevent security incidents.
 - Identify how Check Point Mobile Threat Prevention can help protect data accessed on company-issued smartphones and tablets.
