Network Security Fundamentals (ANSF)

ID AA-ANSF Price US\$ 3,200 Duration 4 days

Course Overview

The Aruba Network Security Fundamentals course covers foundational security concepts and prepares candidates to take the exam to achieve Aruba Certified Networking Security Associate (ACNSA) certification. The course describes common security threats and vulnerabilities and provides an overview of important security technologies. It teaches how to create a trusted network infrastructure with Aruba mobility solutions and switches. In addition to discussing device hardening, the course discusses implementing security at the edge with AAA, basic roles and firewall policies, dynamic segmentation, and endpoint classification. The course will further explain basic threat detection technologies and how to collect logs and alarms and use them to initiate an investigation.

Who should attend

A network or help desk engineer working in a customer or partner environment that has six months to a year of experience in networking. In both wired and wireless environments.

This course is part of the following Certifications

Aruba Certified Associate – Network Security (ACA-NS)

Course Objectives

After you successfully complete this course, expect to be able to:

Protect and Defend

- Define security terminology
- Harden devices
- Secure a WLAN
- Secure a wired LAN
- Secure the WAN
- Classify endpoints

Analyze

- Threat detection
- Troubleshooting
- Endpoint classification

Investigate

- Forensics

Course Content

Security Threats and Aruba Security Strategy

- Threats Overview
- Attack Stages
- Aruba Security Strategy

Security Technologies

- Regulatory Compliance
- Secure Communications: Symmetric Encryption and Hash-Based Authentication
- Secure Communications: Asymmetric Encryption and Digital Certificates
- Secure Communications: TLS

DELIVERY METHODS

ILT – Instructor-Led

Classroom Training

ILT sessions are conducted in a physical classroom environment.

ILO – Instructor-Led

Online Training

ILO sessions are conducted via WebEx in a VoIP environment

FLEX Classroom™ –

Combined ILT & ILO

FLEX Classroom sessions are delivered via ILT and ILO giving you the ultimate flexibility.

- Authentication, Authorization, Accounting (AAA)

Harden Aruba Switches

- Hardening Overview
- Set Up Out-of-Band Management
- Authenticate Managers Securely
- Ensure Physical Security and Other Hardening Actions

Harden ArubaOS Wireless Devices

- Lock Down Administrative Access
- Lock Down Services
- Use CPSec

Enhance LAN Security

- Spanning Tree Protections
- DHCP Snooping and ARP Protection
- Secure Routing Technologies

Network Authentication Technologies

- Network Authentication
- WLAN Security—Encryption + Authentication

Enforce Edge Security with an Aruba Infrastructure

- Enforce WPA3-Enterprise
- Enforce 802.1X on the Wired Network

Enforce Role-Based Authentication and Access Control

- Aruba Role-Based Firewall Policies
- Dynamic Segmentation

Identify and Classify Endpoints

- Endpoint Classification Introduction
- DHCP Fingerprinting with ArubaOS Mobility Devices
- Aruba ClearPass Policy Manager Device

- Profiler
- ClearPass Device Insight

Branch Security

- Introduction to Aruba SD-Branch Solutions

Implement Threat Detection and Forensics

- Understand Forensics
- Analyze ArubaOS WIP Events

Troubleshoot and Monitor

- Introduction to Troubleshooting Authentication Issues
- Using ClearPass Tools to Troubleshoot Some Common Issues
- Packet Captures
- Monitoring
