

## DELIVERY METHODS

### ILT – Instructor-Led Classroom Training

ILT sessions are conducted in a physical classroom environment.

### ILO – Instructor-Led Online Training

ILO sessions are conducted via WebEx in a VoIP environment

### FLEX Classroom™ – Combined ILT & ILO

FLEX Classroom sessions are delivered via ILT and ILO giving you the ultimate flexibility.

# VMware vSAN: Troubleshooting [V7] (VSANT7)

ID VM-VSANT7 Price US\$ 1,850 Duration 2 days

## Course Overview

In this two-day course, you focus on learning the tools and skills necessary to troubleshoot VMware vSAN™ 7 implementations. You gain practical experience with vSAN troubleshooting concepts through the completion of instructor-led activities and hands-on lab exercises.

## Product Alignment

- VMware ESXi™ 7
- VMware vCenter Server 7
- VMware vSAN 7

## Who should attend

Storage and virtual infrastructure administrators who want to be able to perform initial troubleshooting on their software-defined storage with vSAN

## Prerequisites

You must complete one of the following prerequisites:

- Understanding of concepts presented in the VMware vSphere: Install, Configure, Manage [V7] (VSICM7) course
- Completion of the VMware vSAN: Deploy and Manage [V6.7] course or equivalent experience with vSAN
- Experience working with command-line

## interfaces

The course presumes that a student can perform the following tasks with no assistance or guidance before enrolling:

- Use VMware vSphere® Client™ for common operations
- Create and manage VMware vCenter Server® objects, such as data centers, clusters, hosts, and virtual machines
- Create and modify a standard switch
- Modify a distributed switch
- Create a VMware vSphere® VMFS datastore
- Use a wizard or a template to create a virtual machine
- Migrate a virtual machine with VMware vSphere® vMotion® and VMware vSphere® Storage vMotion®

If you cannot complete all of these tasks, VMware recommends that you complete the VMware vSphere: Install, Configure, Manage and VMware vSAN: Deploy and Manage courses before enrolling in VMware vSAN: Troubleshooting.

## Course Objectives

By the end of the course, you should be able to meet the following objectives:

- Describe the software components of vSAN and their roles
- Diagram how the components relate to each other

## DELIVERY METHODS

### ILT – Instructor-Led Classroom Training

ILT sessions are conducted in a physical classroom environment.

### ILO – Instructor-Led Online Training

ILO sessions are conducted via WebEx in a VoIP environment

### FLEX Classroom™ – Combined ILT & ILO

FLEX Classroom sessions are delivered via ILT and ILO giving you the ultimate flexibility.

- Use Skyline Health to investigate and help determine failure conditions
- Use the command-line tools to help determine failure conditions

## Detailed Course Outline

### 1 Course Introduction

- Introductions and course logistics
- Course objectives

### 2 vSAN Architecture

- Describe the vSAN architecture and components
- Describe the policy-driven, object-based vSAN storage environment
- Describe the vSAN software components: CLOM, DOM, LSOM, CMMDS, and RDT
- Explain the relationships between the vSAN software components
- Explain the relationship between objects and components
- Determine how specific storage policies affect components
- Describe component placement

### 3 Troubleshooting Methodology

- Use a structured approach to solve configuration and operational problems
- Apply troubleshooting methodology to logically diagnose faults and optimize troubleshooting efficiency

### 4 Troubleshooting Tools

- Discuss the improvements and added capabilities in Skyline Health for vSAN
- Use Skyline Health for vSAN to identify and correct issues in vSAN
- Discuss the ways to run various command-line tools

- Discuss the ways to access VMware vSphere® ESXi™ Shell
- Use commands to view, configure, and manage your vSphere environment
- Discuss the esxcli vsan namespace commands
- Discuss when to use Ruby vSphere Console (RVC) commands
- Explain which log files are useful for vSAN troubleshooting
- Use log files to help troubleshoot vSAN problems
