Enabling Digital Business

Enabling Digital Business with Collaboration

Immersive collaboration is a requirement to successfully enable a true digital business. State-of-the-art collaboration solutions have proven to deliver measurable business value.

Today, everyone is on the go and needs to stay connected no matter where they are - home, work or in between. For example, end users expect many of their connected experiences in their personal lives to also be available in their professional lives. Companies are accelerating the deployment and expansion of integrated collaboration solutions. One of the core solutions to Enabling Digital Businesses is the use of modern workforce collaborations solutions.

Fast Lane has significantly enhanced Cisco's Authorized Collaboration curriculum with exciting offerings. These new and exclusive courses support business' needs to adopt digital transformation strategies while providing time and cost effective options that ensure a highly skilled and efficient staff.

Bridge Courses

To help you learn the exact skills and knowledge you need in the shortest amount of time possible, we have created an exciting new Cisco Collaboration curriculum. These Certification and Technology Bridge Courses are designed to maximize the learning experience while minimizing investment. These courses "bridge" your current knowledge to ensure you have the understanding and skills required – whether certification driven or solution driven.

Training to fit any Collaboration Job Role

Fast Lane's Collaboration Made Easy curriculum is developed around key job roles that are commonly found in a collaborative enterprise. The skills learned in our solution oriented curriculum will arm you and your entire enterprise with the vital collaboration knowledge to successfully support adoption, migrations and corporate objectives.

New Authorized Cisco Collaboration e-learning Training (ELT)

Now you can learn at your own pace leveraging the exact material used in the Instructor-led courses. The entire CCNA Collaboration and CCNP Collaboration curriculum can be purchased for less than the price of a single ILT course. All ELT courses have one-year subscriptions and include a complete suite of labs in every course that are also identical to the ILT course. You also get practice questions, videos, gamification and more. Go to Fast Lane's Cisco Digital Library page to see more details about the ELT Collaboration portfolio plus the many other Cisco courses covering such topics as Wireless, Security, Cloud and more.
