

CISCO INTENT BASED NETWORKING SEMINAR (SDA-SM)

Fast Lane's Intent Based Networking Seminar is a four-hour overview covering the domains of Security, Analytics, Automation, Assurance, and the Cisco Catalyst 9000 Switch product line as pertaining to a Cisco Software-Defined Access (SD-Access) solution. This seminar is primarily based on a solution set overview with product demonstrations using Cisco dCloud solutions concluding with a brief discussion and Q&A.

The goals of this Seminar are to:

- Discuss the challenges faced with current networking architectures
- Discuss the demands placed on networks in transitioning to a digitally-ready network
- Discuss the new era in networking and intent-based networking
- Discuss Cisco's Software-Defined Access solution
- Discuss the Network as a Sensor premise in Cisco's Enterprise Network Security Model
- Explain the operation, function, components and benefits of Encrypted Traffic Analytics
- Discuss the analytics, assurance and insights gained from a network using Cisco DNA Center
- Discuss network automation using Cisco DNA Center
- Discuss the features, benefits and capabilities of the new Cisco Catalyst 9000 switches

FAST LANE SDA SEMINAR SERVICES

Fast Lane is a Global Consulting and Education Services company with a focus on Cisco, Microsoft, NetApp, Gigamon, Barracuda and others. Fast Lane also provides Professional Services that augment and support our vendor partners and their partner ecosystems. The Fast Lane group is the leading provider of IT education for the most established, respected and innovative technology companies across the globe. We provide coaching, technology and business education as well as consulting services to vendors and their channel and end-user customers. We are also the leading courseware developer for several of our vendor partners. We are well positioned to meet all needs by producing highly-individualized learning materials focused on helping organizations achieve their business goals.

We apply our wealth of experience in both innovating Learning Solutions and enabling Digital Transformation across industrial and enterprise environments. We enable our customer's digitalization initiatives by focusing on the business outcomes part of the digital equation. We help transform the culture in an organization to enhance sales, improve marketing and focus on business-oriented customer solutions.

We bring thought leadership to a world of Digital Transformation that can produce significant returns for your company, your partners and your customers. Across the enterprise, we help you thrive in an interconnected reality of digital technology and communications to greatly enhance decision-making, human capital growth and ultimately, customer relationships.
