

CISCO SOFTWARE DEFINED ACCESS TEST DRIVE (SDA-TD)

Fast Lane is working with Cisco to provide a learning experience to orient the customer to SD-Access and demonstrate how the SD-Access solution helps to achieve the goals of simple network provisioning without compromising security for users and devices. This interactive event focuses on highlighting the SD-Access solution and providing you with a hands-on experience.

This test drive is a focused two-day immersion into SDA with dedicated hands-on lab time. Combining structured education with hands-on experience of setting a security policy for various users, provisioning new network devices for inclusion into the SDA fabric, and how to manage it all via a single interface. This a pre-sales look into the Cisco SD-Access solution set. The intent is to provide technical decision makers a demonstration of the solution set in order to reach an informed buying decision.

Cisco Software Defined Access Test Drive topics include:

- New Era of Networking Overview
- Cisco Software Defined Access
- DNA Center
- DNA Wireless and Security
- Catalyst 9K
- Programmability
- Licensing and Software
- DNA Advisor
- Programs and Incentives

FAST LANE SDA TEST DRIVE SERVICES

Fast Lane is a Global Consulting and Education Services company with a focus on Cisco, Microsoft, NetApp, Gigamon, Barracuda and others. Fast Lane also provides Professional Services that augment and support our vendor partners and their partner ecosystems. The Fast Lane group is the leading provider of IT education for the most established, respected and innovative technology companies across the globe. We provide coaching, technology and business education as well as consulting services to vendors and their channel and end-user customers. We are also the leading courseware developer for several of our vendor partners. We are well positioned to meet all needs by producing highly-individualized learning materials focused on helping organizations achieve their business goals.

We apply our wealth of experience in both innovating Learning Solutions and enabling Digital Transformation across industrial and enterprise environments. We enable our customer's digitalization initiatives by focusing on the business outcomes part of the digital equation. We help transform the culture in an organization to enhance sales, improve marketing and focus on business-oriented customer solutions.

We bring thought leadership to a world of Digital Transformation that can produce significant returns for your company, your partners and your customers. Across the enterprise, we help you thrive in an interconnected reality of digital technology and communications to greatly enhance decision-making, human capital growth and ultimately, customer relationships.
