

## Digital Literacy

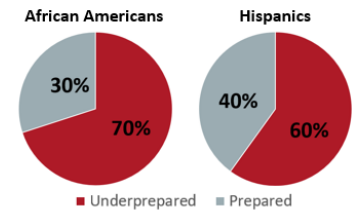

*Expanding economic opportunities for everyone.*

Fast Lane Education & Consulting Services operates globally, across 60+ countries, in the delivery of technology, business, and sales training. We specialize in **Workforce Innovation & Development programs** such as Digital Literacy, Cloud Literacy, IT Fundamentals, and much more. In addition, we provide comprehensive consultancy services in Cloud, Cybersecurity, Digital Transformation and Mobility.

**Culture, diversity, equity, and inclusion** are the pillars of our workforce, and we are striving to create a more inclusive community through partnerships and training.

Digital Literacy is the cornerstone to prospering in our digital world. Our approach is designed to equip and empower learners to thrive in our modern digital economy. This training program creates a strong foundation of skills in digital competencies to advance the learner's understanding of how to consume and navigate technology.

**Minorities who reported being underprepared with digital skills, affecting their employability**

We implement the **Learn, Practice, and Certify model** to support learning and validate a mastery understanding of concepts through certification. This ensures learners not only acquire the knowledge but can apply the knowledge.

A few key features of our training services include:

Upon successful completion of each assessment learners will be awarded digital badges and poised to attain their IC3 Certification.

*"The course not only provides learners with the digital skills needed today, but it also helps them build confidence. We continuously receive positive feedback from the learners that really highlights how empowered, and confident, they feel about their future with technology."*

*-Terolyn Phinsee, CEO of Zip & Go Assist*

Fast Lane is committed to closing the digital divide (locally and globally) across the world. Join our partner alliance to improve the economic development of underrepresented communities. Schedule a meeting with one of our Workforce Innovation Specialists today. Build a better tomorrow with us!
