TRAINING

Over the past 20 years, VMware has transformed the data center and today securely connects, manages and automates the world's complex digital infrastructure. Through VMware training, grow the skills you need to fully leverage the power of VMware technologies.

In partnership with VMware Fast Lane offers the complete set of official VMware courses in vSphere, Horizon, NSX, vSAN, vRealize, Airwatch and much more. Whether you are looking for Instructor-led in-classroom, Instructor-led online, private or self-paced e-learning options, Fast Lane has all the training you need!

SERVICES

Trained employees are critical to IT success, but how often do you need that extra bit of help to understand exactly how to approach your specific implementation, or even help with creating and executing on that implementation.

Through Fast Lane's VMware Professional Services, we can help with architecture, design, implementation, migration, troubleshooting and maintenance of your VMware infrastructure to meet your IT and business goals.

THE FAST LANE DIFFERENCE

In today's complex IT world, it can be hard to draw a line between training and services when it comes to providing the expertise customers are looking for to enable their success. Fast Lane believes in a full learning-as-a-service methodology to not only get you the training you need today, but to continue that training as your infrastructure and your people grow.

Ask your Fast Lane sales representative about our full LAAS program solutions that can include pre-assessment, training and services, post-assessment, skills reinforcement, mentoring, practice opportunities and an ongoing learning path design to meet your needs.

ABOUT FAST LANE

Fast Lane is the leading, worldwide provider of advanced IT education for Cisco, NetApp, VMware, Microsoft and many other leading technical vendors. We enable our customers to execute their digital business strategies through our comprehensive portfolio of authorized training courses focused on emerging technologies and through our services such as custom content development, sales enablement, demand generation, and business transformation. Our core competency is the outsourced delivery, development, and management of vendor authorized technical training on advanced technologies. With one of the world's largest dedicated training lab environments coupled with the combination of physical offices in over 30 countries and partners in 40 others, Fast Lane has a worldwide reach untouched by any other training organization.
